

Blockchain Made Sustainable

Feeding the Blockchain Revolution with Renewable Energy

Bitminer is a startup from Angeli's Group, constructors and energy producers for 40 years. With more than 20 collaborators and more than €3M revenues, we are the largest industrial crypto-mining group in Italy. Today, we decided to go to the next step: we want to allow everyone to participate in our project, by purchasing our token. It's a mining contract, that allow anyone to benefit from the production of our mining and renewable energy plants.

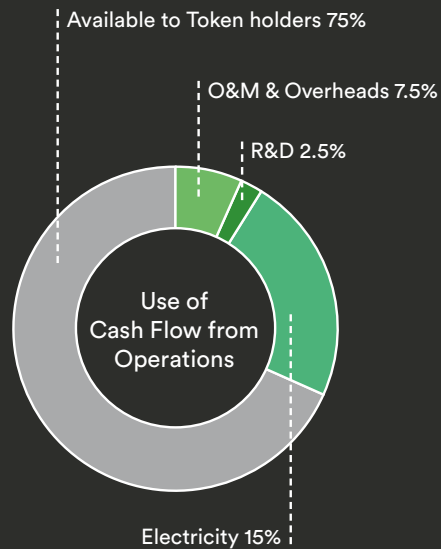

I nostri partner

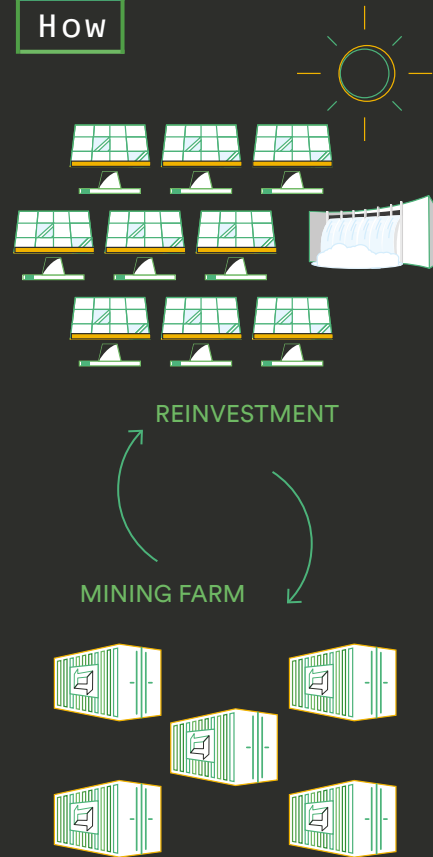

The Project

We want to make the Blockchain sustainable, using renewable energy to mine cryptocurrencies, while sharing the benefits with our token holders.

How

OUR PILLARS

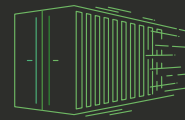

Operations excellence

Synergy between mining and renewable energy

Flexibility through mobile units

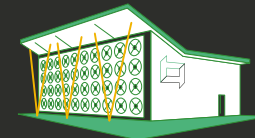

Risk diversification through renewable energy projects

When

31 July 2018

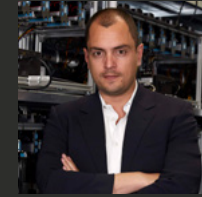

First delivery

End of 2018

Full delivery of Mining Assets and Services

Who

Gabriele Angeli
Founder, Operations

Gabriele Stampa
Founder, Sales

More

20

collaborators and advisors

KEY FIGURES

1.2 MW

Electrical Infrastructure

1000

1000 active mining rigs

3

Countries with Bitminer Operations

3

Mobile mining units
